

**Assurance Statement related to Greenhouse Gas Report 2020  
prepared for  
PTT Global Chemical Public Company Limited**

**Terms of Engagement**

This Assurance Statement has been prepared for PTT Global Chemical Public Company Limited.

Lloyd's Register (LR) was commissioned by PTT Global Chemical Public Company Limited (GC) (555/1 Energy Complex, Building A, 14<sup>th</sup>-18<sup>th</sup> Floor, Vibhavadi Rangsit Road, Chatuchak, Bangkok 10900, Thailand) to assure its Greenhouse Gas (GHG) Report for the calendar year 2020 (hereafter referred to as "the Report").

The Report relates to direct GHG emissions, energy indirect GHG emissions and other indirect GHG emissions as summarized in Table 1 below.

The GHG emissions associated with the operations and the facilities located outside Thailand and where GC has no operational control were excluded from the Report.

**Management Responsibility**

GC's management was responsible for preparing the Report and for maintaining effective internal controls over the data and information disclosed. LR's responsibility was to carry out an assurance engagement on the Report in accordance with our contract with GC.

Ultimately, the Report has been approved by, and remains the responsibility of GC.

**LR's Approach**

Our verification has been conducted in accordance with ISO 14064–3:2006, '*Specification with guidance for validation and verification of greenhouse gas assertions*' to provide limited assurance that GHG data as presented in the Report have been prepared in conformance with ISO 14064–1:2006, '*Specification with guidance at the organizational level for quantification and reporting of greenhouse gas emissions and removals*'.

To form our conclusions the assurance engagement was undertaken as a sampling exercise and covered the following activities:

- conducted remote verification site visits to the corporate office at Rayong and its operations at GC's Branch 2 (HDPE and Utilities plants), Branch 3 (Olefins plant), Branch 5 (Aromatics plant), Branch 6 (Refinery plant), Branch 11 (PE), GGC (Global Green Chemicals), PTTAC (PTT Asahi Chemical) and reviewed processes related to control of GHG emissions data and records;
- interviewed key personnel responsible for the management of GHG emissions data & records and for the preparation of the GHG Inventory at the above sites;
- conducted offsite review of the GHG emissions data for other indirect GHG emissions;
- sampled datasets and traced data back to aggregated levels to cover the GHG emissions data as summarised in Table 1;
- verified the historical GHG emissions data and records for the calendar year 2020; and
- verified the recalculation of the 2012 base year GHG emissions to account for changes in the market-based emission factors that has further improved the data accuracy.

### **Level of Assurance & Materiality**

The opinion expressed in this Assurance Statement has been formed on the basis of a limited level of assurance and at a materiality of the professional judgment of the Verifier.

### **LR's Opinion**

Based on LR's approach nothing has come to our attention that would cause us to believe that the total direct GHG emissions, energy indirect GHG emissions and other indirect GHG emissions disclosed in the Report as summarized in Table 1 below are not materially correct and that the Report has not been prepared in conformance ISO 14064-1:2006.

### **LR's Recommendations**

GC should further:

- Ensuring effective internal verification programs across its branches and subsidiaries; and
- To define criteria - identify significant of GHG Scope 3 (Cat. 1-15) and prepare to quantify and report the significant categories.

**Table 1. Summary of GC, GHG Report 2020**

<b>Scope of GHG emissions</b>	<b>CY 2012</b> 01 Jan - 31 Dec 2012 (as recalculated base year)	<b>CY 2020</b> 01 Jan - 31 Dec 2020
Direct GHG emissions (Scope 1)	5,744,027	5,882,480
Energy indirect GHG emissions (Scope 2, Market-based)	2,724,738	1,979,371
Energy indirect GHG emissions (Scope 2, Location-based)	27,993	19,234
Other indirect GHG emissions (Scope 3)	2,684,944	32,078,748
Direct GHG Emissions (Scope 1) from combustion of biomass	1,394	1,286
Notes: <ul style="list-style-type: none"> <li>• Scope 2, Location-based and Scope 2, Market-based are defined in the GHG Protocol Scope 2 Guidance, 2015.</li> <li>• Data is presented in tonnes of CO<sub>2</sub> equivalent except for the GHG emissions from combustion of biomass which is in tonnes of CO<sub>2</sub> only.</li> <li>• Recalculation of the 2012 base year GHG emissions was done to account for changes in Market-based EF and Biogenic emissions</li> <li>• Scope 3 emissions include those associated with the purchased goods and service (emissions of main raw material and water withdrawal), upstream transportation and distribution (main raw material pipeline transportation and electric power transmission and distribution losses), waste generated in operations (end-of-life industrial waste treatment by landfill, incineration and wastewater treatment), business travel (employee air travel), downstream transportation and distribution (polymers products), processing of sold products (polymers products), end-of-life treatment of sold product (polymers products), and use of sold product (Diesel, LPG, Jet Fuel, Marine Fuel oil, Kerosene, Propane, Butane) and Biodiesel (B100).</li> </ul>		

This Assurance Statement is subject to the provisions of this legal section:

This Assurance Statement is only valid when published with the Report to which it refers. It may only be reproduced in its entirety.

Lloyd's Register Group Limited, its affiliates and subsidiaries, including Lloyd's Register International (Thailand) Ltd. and their respective officers, employees or agents are, individually and collectively, referred to in this Legal Section as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Due to inherent limitations in any internal control, it is possible that fraud, error, or non-compliance with laws and regulations may occur and not be detected. Further, the verification was not designed to detect all weakness or errors in internal controls so far as they relate to the requirements set out above as the verification has not been performed continuously throughout the period and the verification carried out on the relevant internal controls were on a test basis. Any projection of the evaluation of control to future periods is subject to the risk that the processes may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The English version of this Assurance Statement is the only valid version. Lloyd's Register assumes no responsibility for versions translated into other languages.

In the case of any conflict between the English and Thai language versions of this legal section, the English version shall prevail.
