

“We’re Farming The Future”

**Pain Point
Excessive Organic Waste**

**Thailand produces
around 27 million
tons of waste**

26%

**of which were
handled
inappropriately**

**The Pollution Control
Department**

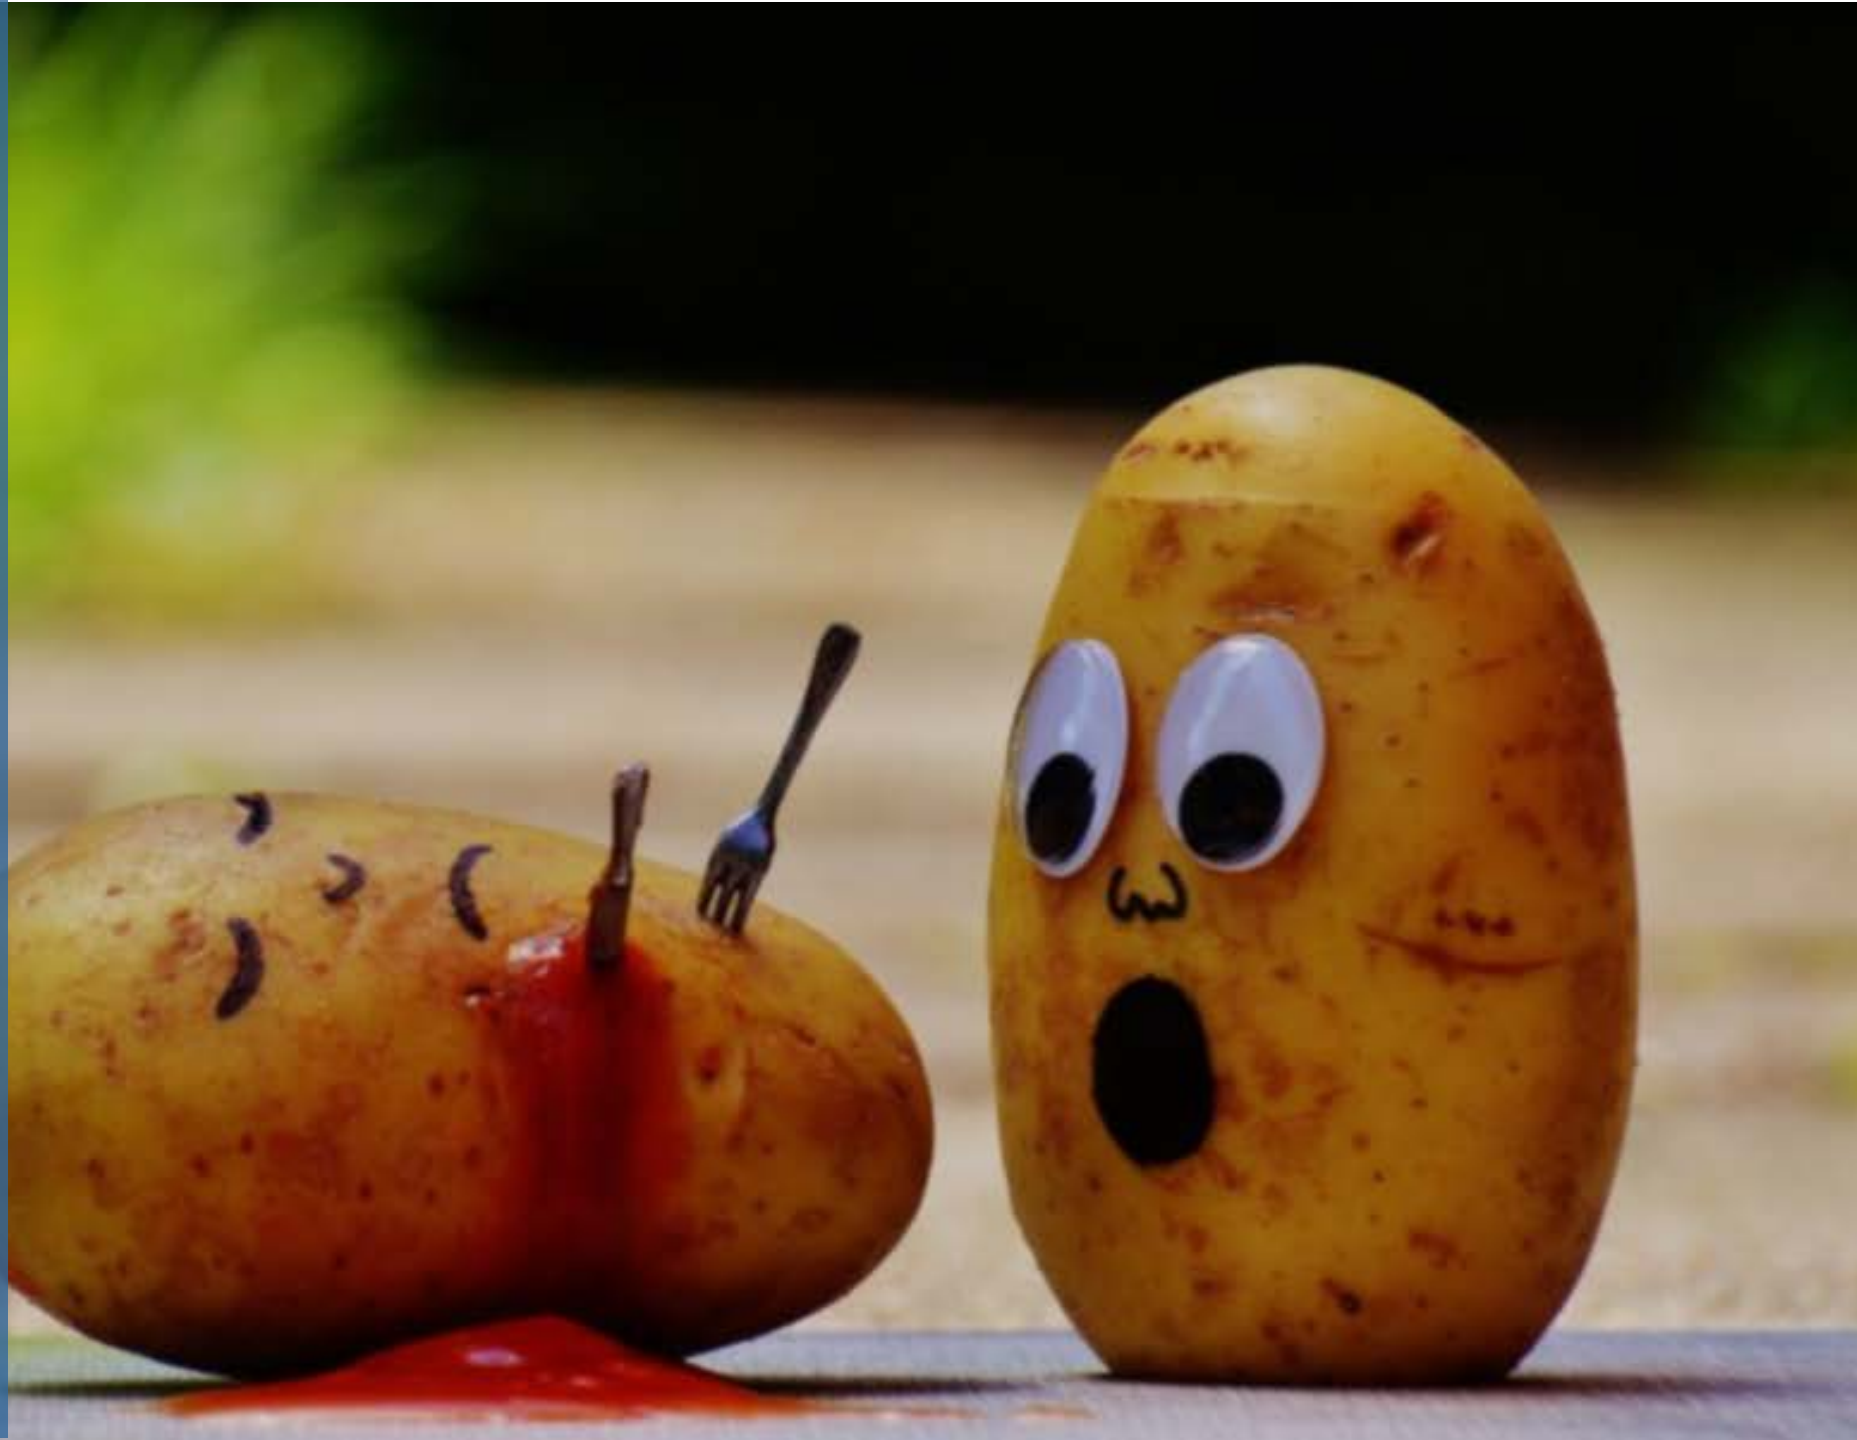

Pain Point

Excessive Organic Waste

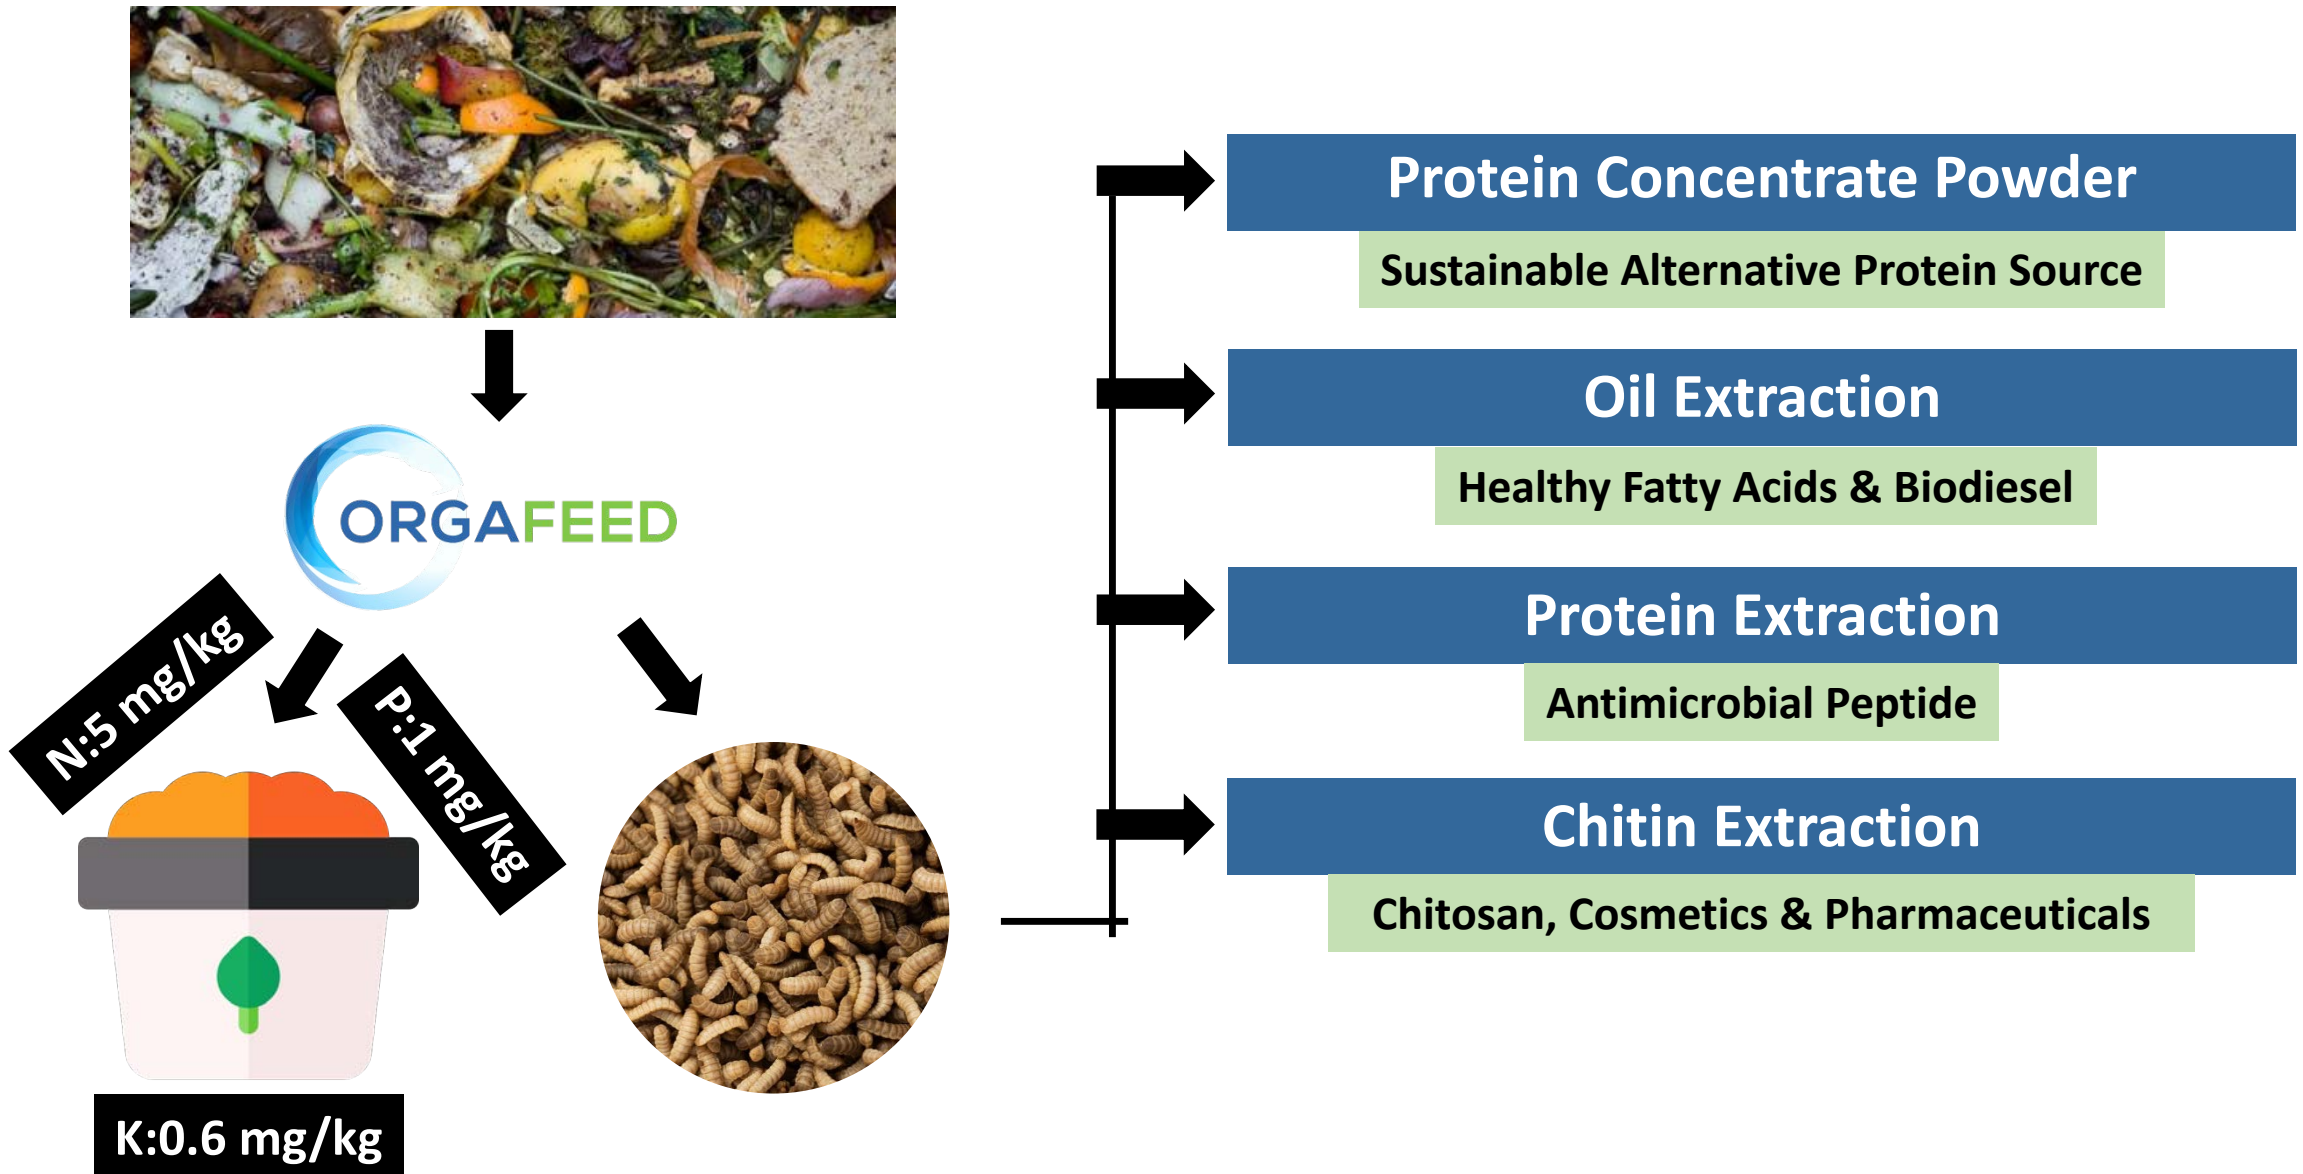

1/3

of food produced
for human
consumption is lost
or wasted globally

The Food and Agriculture
Organization (FAO)

High Value Products With a Truly Circular Economy

Incredible Natural Decomposer

Highly efficient in waste reduction

Centralized Greenhouse With Decentralized Workforces

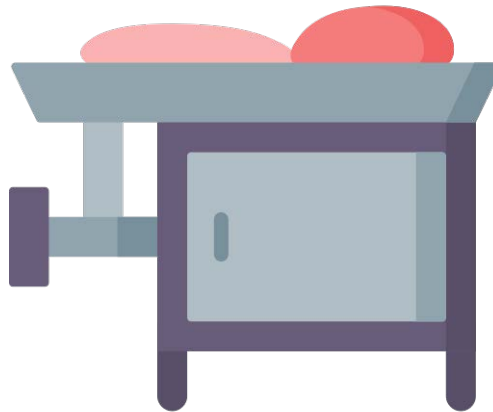

Minimal Capital Expenditure.....

Expected Total CAPEX = 120k Bt

Greenhouse ~50
sq.m.

Food Grinder

Plastic
Containers

..... With Impactful Results

In exchange for organic wastes, animal feed and fertilizer will be distributed equally to participants

**3 Tons of waste
Upcycled**

**150 Kg
Insect Protein**

**1.5 tons of
Fertilizer**

Monthly basis

Meet the Orgafeed

Core Team

Mr. Ittikorn T.

Managing Director

**Hands-on Insect Farmer.
Involved in several business
units from product
development to
marketing activities**

Dr. Attawit K.

Director of R&D

**PhD in Animal Science and
Technology. His work focuses
specifically on feed
formulation for animals based
on precision animal nutrition**

Ms. Rata L.

Business Development

**Experienced in various
sectors as a financial
analyst, her work is mainly
to optimize a business
model**

THANK
YOU
